

LIFE IS SHORT... FLY FAST

Knot Wax

Plane Truth...

Wax thins out
Wax washes off
Wax loses it's properties quickly
Wax has poor UV protection
Wax needs frequent reapplication
Wax works only at the surface level
Wax produces static electricity
Wax melts at about 110F

Knot Wax will not thin out
Knot Wax doesn't wash off
Knot Wax keeps it properties 10 times longer than wax
Knot Wax has excellent UV protection
Knot Wax needs no reapplication for up to a year
Knot Wax works at the molecular level
Knot Wax produces no static electricity
Your airplane will melt before *Knot Wax* will
